

Flight Instructor (Full Time) – Job Description

Certified Flight Instructors at Thrust Flight can instruct various programs in a multitude of aircraft, with opportunities for cross-country aircraft deliveries and gaining the hours you need to get to the airlines in a short amount of time. Too often we see flight instructors working at schools that tend to be "pilot mills" with an "get 'em in-and-out" attitude. Our flight instruction team actually enjoys flying! We do get students through our programs quickly and efficiently, but it's the process that sets us apart from the competition. Instructors enjoy our free monthly workshops, visits from our Airline Partners, and discounted additional ratings.

Key responsibilities:

- Provide outstanding flight instruction and mentoring to students, renters and customers of Thrust Flight
- Promote and market Thrust Flight products and services to those you meet both at work and in your daily life
- Adhere to Thrust Flight policies and operating procedures as well as all state, local and federal laws and regulations
- Coordinate with dispatchers and other instructors to ensure safe and efficient operations and to exceed customer expectations
- Coordinate with dispatchers to establish a standard schedule of availability;
- Other projects and duties as opportunities arise;

This is considered a full-time employee position with varying schedules comprising an approximate 40-hour week.

This offer and subsequent contract are contingent upon achieving a CFI-I rating.

Compensation is competitive with the industry and will be discussed in an interview.

Hours are TBD. Once set, employees are expected to be available during those scheduled hours on a consistent basis and be on site at least 15 minutes prior to any scheduled session.

Flight instructors report to the Chief Pilot for all flight operations issues; and to the Operations Manager for all other issues.
