

Maintenance and Avionics– Job Description

There's never a dull moment at our maintenance facilities at Thrust Flight. Not only do our mechanics get to enjoy working on a multitude of different aircraft for our flight school fleet but also on planes from all around the country. From simple oil changes to complete engine overhauls, Thrust Flight does it all.

Thrust Flight is a proud partner of Dynon Certified and is pleased to provide the design and installation services for the SkyView HDX and supporting systems. With the FAA STC approvals moving along we're looking for a fast-paced individual to grow with us during this innovative and exciting time.

General Mechanic Requirements:

- A&P Licensed
- Basic Tools
- Flexible Schedule (Open 7 days a week, we will be hiring for both weekdays and weekends)

Avionics Requirements:

- Dynon, Garmin, or Avidyne experience
- Basic Tools including electronic wiring tools
- 2 Years Associate Degree in a related field
- FCC Licenses
- General Aviation experience
